

## RV Bottom Pans

*Before: 4 Parts*

*Wear Bar*  
*Metal Pan*  
*Wiper*  
*Aluminum Extrusion*

*After: 1 Part*

For recreational vehicle models with slide-out rooms, sealing solutions that assure waterproof performance enhance customer satisfaction. Boyd takes slide-out seals to the next level by incorporating multiple solutions into one deliverable - helping our customers increase manufacturing efficiency and simplifying inventory management.

Boyd's patented bottom pans combine wear bars, wiper pans and splash guards for RV slide-out rooms. Specialized for both standard and flush floor rooms. Our contemporary one part design replaces existing multi-part solutions.

### Special Features

Barrier to water, dust, mud, wind, insects & other environmental elements

Cohesive one piece design eliminates seams, further protecting against water ingress

Combines slide-out room wear bars, bottom wipers, pans & splashguard in one extrusion

Easily adaptable to current models

Environmentally-friendly recyclable raw materials

Heat activated tape to aid in installation with wall mount support during install & additional weather sealing performance

Long lifetime flexible wipers for water removal from slide walls during open / close

Modern, inventive design conforms to technologically-advanced buying trends

Protects interior flooring from wear & tear as rooms slide in & out

Splash guard shields road debris & spray

UV protected for performance in the harshest environments

Custom designed for your specific application dimensions

## RV Bottom Pans

### Common Materials

Custom color matching  
Heat activated tapes  
Plastic compounds  
Thermoplastics  
TPE  
TPO  
TPV  
UV hardcoats & custom textures  
Variety of durometers

### Special Characteristics & Solutions

Combines slide-out room wear bars, bottom wipers, pans & splashguard in one extruded design

Contemporary one-part design replaces existing multi-part solutions:

- Reduces labor & assembly costs
- Simplifies sourcing & procurement channels
- Reduces inventory, storage space & complexity
- Replacing metal with plastic improves processing, handling, storage & installation safety
- Simple & cost effective

Easily adaptable to current RV models

Multiple colors available

Solutions can be custom kitted

Tri & quad extrusions combining multiple raw materials & durometers in one component

Boyd Corporation has over 90 years of customer-focused performance success and is a global leader in advanced sealing, thermal management and protection solutions. Empowering human curiosity through the safe exploration of space. Enhancing the safety and flexibility of medical care and transportation. Enabling faster, brighter, more functional technology with greater power density. From self-driving cars to brain surgery, space stations to smart farming, high powered computing devices to wearable medical technologies. As our customers redefine their markets and technology - unique solutions from Boyd empower them to be possible.

- Dedicated Engineering Design Centers on 3 Continents •
- Replicated Manufacturing Technology Across 10 Countries •
  - Cleanroom Manufacturing Class 100 to 100,000 •
  - Rapid Prototyping •
