Compare the efficiency of the Kona fan at 50 Hz and 60 Hz with different air flow rates. The graph shows the relationship between air flow (m³/min) and Q/Initial Temperature Difference [W/°C].

- **Kona Fan @ 50 Hz**
  - 7.5 lpm
  - 3.7 lpm
  - 1.8 lpm
  - 0.94 lpm

- **Kona Fan @ 60 Hz**

Air Flow (m³/min) vs. Q/Initial Temperature Difference [W/°C]
