

Silicone tubes – fabric reinforced - SILPRESS®

Applications:

Beverage filling technologies
Medical industry
Mechanical engineering

Quality – standard (in stock):

Silicone: translucent
70° Shore/ 60° Shore A

Food quality as per

- BfR XV. Silicone
- FDA § 177.2600

Suitable for sterilisation with

- hot air 200° C
- steam 134° C
- gas (EO)
- gamma rays

Fabric – standard (in stock):

Standard glass fibre

Tolerances:

S2 DIN 7715
EN ISO 1307 upon request

Dimensions:

Inside diameter:
ranging from 1.0 mm to 25.0 mm

Test pressure – burst pressure:

see technical data sheet

Custom-made product:

Quality, color or fabric –
other than standard
from 500 m upon request
